DAY-4

(#) Subquery :-

A subquery is a query nested inside another SQL query. it can be used inside SELECT, FROM, or WHERE clauses.

Que: Show all employees whose salary is more than the average salary of all employees?

Solu:-
```
SELECT * FROM employees
WHERE salary > ( SELECT
AVG(salary) FROM employees);
```

Que: Write a query to get the second highest salary from the employee table?

Solu:-
```
SELECT MAX(salary) AS sec_highest_
salary FROM employees
WHERE < ( SELECT MAX(salary)
FROM employees);
ORDER BY salary DESC
LIMIT 1;
```
