

log() Function :-

~~SELECT \*, log(marker)~~

S-1

SELECT \*, LAG(marker, 1, 0) OVER (partition by student-id ORDER BY exam\_month)  
FROM exam\_scores;

S-2

SELECT \*, LAG(marker, 1, 0) OVER (PARTITION BY student-id ORDER BY exam\_month),  
(marker - LAG(marker, 1, 0) OVER (PARTITION BY student-id ORDER BY exam\_month)) AS change  
FROM exam\_scores;

For instance :-

| Marker | Lag | Change |
|--------|-----|--------|
| 80     | 0   | 80     |
| 85     | 80  | 5      |
| 78     | 85  | -7     |

Till S-1

Till S-2

★ LEAD() :-

Return the value from  
next row.

Q-1

```
SELECT *, LEAD(marks, 1, 0) OVER
(PARTITION BY student-id ORDER BY
Exam-month)
FROM Scores;
```

Q-2

```
SELECT *, LEAD(marks, 2, 0) OVER (PARTITION
BY student-id ORDER BY Exam-month),
(marks - LEAD(marks, 2, 0) OVER (
PARTITION BY student-id ORDER BY
Exam-month)) AS Change
FROM Exam-Scores;
```

for instance

| marks | LEAD | Change |
|-------|------|--------|
| 80    | 85   | -5     |
| 85    | 78   | 7      |
| 78    | 0    | 78     |
